Going Home: Your Heart Health Plan

Mission Bay Heart & Vascular Center · Cardiology Unit 4 West

Keep this packet. Bring it to every follow-up visit.

PATIENT	Robert J. Morgan
DATE OF BIRTH	04/03/1956
MRN	MBH-2209-4471
ADMITTED	Tue 17 Nov 2026
DISCHARGED	Fri 20 Nov 2026, 2:10 PM
DISCHARGING PHYSICIAN	Imani Okoye, MD (Cardiology)

Why you were here: your heart failure got worse (fluid build-up). You went home on new medicines and a low-sodium eating plan. The first two weeks matter most: weigh yourself every morning, keep to the sodium and fluid limits, and keep every follow-up visit.

Call us right away if

• you gain more than 2 lb in a day or 5 lb in a week • you are more short of breath than usual
• your ankles swell • you feel dizzy or faint • you notice unusual bleeding or bruising (warfarin)

Nurse line (24 h): +1 415-555-0300 Emergencies: 911

We will never text or call you to ask for a date of birth, insurance number or payment. If someone does, it is not us.

Your medicines

Take these exactly as listed. Stop taking: potassium chloride (no longer needed).

Medicine	Strength	Dose	When	Notes
Furosemide	40 mg	1 tablet	Morning	Water pill. Weigh yourself first.
Metoprolol succinate	25 mg	1 tablet	Morning	Do not stop suddenly.
Lisinopril	10 mg	1 tablet	Morning	Stand up slowly.
Warfarin	5 mg	1 tablet	Evening, 6 PM	Blood thinner. INR checks. See note *
Atorvastatin	40 mg	1 tablet	Bedtime	

* Warfarin and food: vitamin K changes how warfarin works. Keep the amount of vitamin K you eat steady from week to week. Do not suddenly add (or drop) leafy greens such as spinach, kale or collards. Your INR is checked at the lab (see page 3); the dose may change after that.

Daily routine

Time	Do this
7:00 AM	Weigh yourself (after the bathroom, before breakfast). Write it down.
8:00 AM	Furosemide, metoprolol, lisinopril with breakfast.
6:00 PM	Warfarin.
10:00 PM	Atorvastatin.

Follow-up visits

All visits are at the Mission Bay campus, 1825 4th St, San Francisco, CA 94158. Arrive 15 minutes early. A family member may drive; patients should not drive for 2 weeks after discharge.

Visit	Date	Time	Where
INR blood test (lab draw)	Mon 30 Nov	7:30-7:45 AM	Lab, Building A, ground floor
Cardiology follow-up - Dr. Imani Okoye	Tue 1 Dec	10:30-11:30 AM	Building B, 3rd floor, Suite 310
Cardiac rehab orientation	Thu 3 Dec	2:00-3:30 PM	Rehab Center, Building C
Echocardiogram (heart ultrasound)	Wed 9 Dec	9:00-10:00 AM	Imaging, Building A, 2nd floor

Times are Pacific Time. Changes after printing are listed in the addendum (page 6).

Before each visit

Lab (INR): no need to fast. Take warfarin as usual the night before.
Cardiology: bring your weight log and this packet.
Rehab orientation: wear walking shoes; plan for 90 minutes.
Echocardiogram: no preparation; allow 1 hour.

Eating for your heart

Sodium: 1,500 mg a day

Fluids: 2 litres a day

CHOOSE

- Fresh fruit and vegetables
- Skinless chicken or turkey
- Fish: salmon or any white fish (cod, halibut)
- Plain Greek yogurt
- Oats, quinoa, brown rice
- Unsweetened plant milk
- Olive oil, herbs, lemon, garlic (instead of salt)
- Egg whites

LIMIT

- Whole eggs: see list
- Cheese: Swiss or fresh mozzarella only, 1 oz a day
- Bread: 2 slices a day
- Red meat: once a week
- Coffee: 2 cups a day

AVOID

- Bacon, sausage, deli meats
- Canned soups and broth (unless 'no salt added')
- Frozen meals: pizza, burritos, nuggets
- Soy sauce, hot sauce
- Chips, pretzels, salted nuts
- Parmesan, cheddar
- Sweetened or flavoured yogurt

Reading labels: anything over 400 mg sodium per serving is a high-sodium food. 'Low sodium' means 140 mg or less. Restaurant food is usually high in sodium: ask for no added salt.

Week 1 shopping list

Our dietitian's list for the first week at home (one person). Notes are below the table.

Item	Amount
Atlantic salmon fillet (1)	2 lb
Boneless skinless chicken breast	2 lb
Plain Greek yogurt, 32 oz	2
Instant oatmeal (plain)	1 box
Unsweetened almond milk, 64 oz	2
Blueberries, 6 oz	2
Bananas	2 lb
Baby spinach, 5 oz (2)	2
Broccoli crowns	2 lb
Carrots, 2 lb bag	1
Quinoa, 16 oz	1
Extra virgin olive oil	1
Lemons	4
Garlic	2 heads
Large eggs, 12 ct (3)	1

(1) Any fish works: salmon, or a white fish such as cod if he prefers.
(2) Only for patients NOT taking warfarin. On warfarin, skip new leafy greens this week (see page 2).
(3) See the addendum on page 6.

Addendum - changes after printing

Added Sat 21 Nov 2026 by the care team. Where this page and pages 1-5 disagree, this page is correct.

A-1 Cardiac rehab orientation has MOVED to Fri 4 Dec, 1:00-2:30 PM (same place: Rehab Center, Building C). The Thu 3 Dec time on page 3 is cancelled.

A-2 Week 1 list: the oatmeal must be plain (no flavoured packets).

A-3 Week 1 list: replace the large eggs with one carton of liquid egg whites (16 oz). Whole eggs are on hold until the cardiology follow-up.

A-4 The echocardiogram on Wed 9 Dec is unchanged.

Questions about these changes: nurse line +1 415-555-0300.
